

New Turbine Workshop

Opening Statement from the Head Master

By Ken Rieli

It's a cold winter's day here in northern Michigan. After a brief thaw at the end of December, we were immediately plunged into an Arctic blast out of Canada. The frigid cold is like the times we live in - too many frigid excuses from the rich class as to how and why they mismanaged the global economy.

Well, we've had enough of their lame excuses, and it's time we take the law into our own hands & determine our own individual futures! Too many people around the world view themselves as just another cog in a pandemic communist world - communism orchestrated by almost every government and industry worldwide, and supported by society and their chief propaganda machine - education!

If one element of the world system fails, it all fails due to this co-dependent interrelationship of communist societies - and that's got to stop now, or the economies will never recover, and supplies will continue to collapse as prices go through the ceiling, and job loss mounds higher.

We began to warn the world decades ago that this situation was coming - just like Tesla warned of the same thing back in the early 20th century - and now it has arrived. The world is doomed to a toxic slow death if we do not move now, and move *fast* to head off the ecological disaster in the making.

The real solution to most of the world's problems is to empower the individual - from the bottom-up, not the top-down. Contrary to what most people believe, Reaganomics or trickle-down is nothing but a ploy to dupe the public into serving the rich. It's the wealthy class that has caused all of the trouble through greed, and since we do not have a true democracy here in the U.S. - or anywhere in the world - they continue the destructive practice of taxation without representation.

By empowering the individual to become self-reliant, we strengthen the very foundation of real democracy - or rule by the people. Remember, the USA was not founded as a democracy, but rather as a republic. Since then, we have seen the rise of Aristocracy - rule by the rich, and with all of congress in on the take, there will never be a political solution.

The only true and lasting solution must come from within the ranks of individuals, who then make up the ruling masses. It's time for us to take back our country & our world from the communist politician freaks who lie in bed with the rich. It's time for us to overthrow oppressive taxation - starting with global-wide property taxes - seize control of our own lives and self-determination, and dis-empower the rich & their political stooges!

The New Turbine Workshop is a multi-functional tool to set the world free from international greed and extortion. It is a discipline, an education, a militarism, a religion, a new way of life.

Jesus began this movement 2,000 years ago when he revolted against the Jewish Sanhedrin of his day. Today we are armed with more technical power than he dreamed of - to finish the task.

If you stick with this program, it will be a tough discipline - like going back to technical college, but it will also be a lot of fun, as we take a new hands-on approach to research, development, and engineering.

We have designated the year 2011 as the Year of the Sun.

Beginning in January we will cover some of the technical basics of building the 7-inch turbogenerator featured on our new CD. Since the shaft assembly is the only somewhat critical part, that's where we'll begin.

Over the next several months, we will then look at how our solar reflector assembly is constructed, followed by system component hook-ups.

By June we should have the entire system assembled - along with solar tracking technology - and ready for the hot suns of July to power it up. The balance of the year will be spent tweaking the system, recording results, and developing a baseline for setting the world free with individual power - Powered by the Sun.

Are you with us?!!!
